[illegible]

Entered at Chicago Postoffice as mail matter of the second class.

SATURDAY, JULY 31, 1909.

Lake cargo for August ships 6@7 per cent. Receipts were dull. New York underwrote at 2½ cents discount. Sterling was firm. The stock market was weak and narrow. The Chicago produce markets were more active, with greater strength in provisions and decided weakness in provisions, due to the closing report of crops. Wheat was strengthened by the net reaction in the Visible, foreign deliveries of cash grain, as well as by some foreign demand, but weakened with Tuesday cash wheat 7½ cents lower, July 6 cents lower, corn 2¼ cents lower, wheat 7½ cents higher, corn 4 cents higher, oats 4 cents higher, pork 50c, lard 27½c, and ribs 17½c, and September, but November is about steady.

The Democratic leaders have been State Committee in Springfield and have not recommended their [illegible]. The proposition seems to be that the State shall be divided by counties, and that the Democratic majority in each county shall be given to the Democratic candidate for governor, and that the Democratic majority in the State shall be given to the Democratic candidate for governor. This is a scheme which will require a good deal of explaining to the people, but it is probably the best that can be devised.

Senator Aldrich has announced that he will not be a candidate for reelection to the United States Senate. He has been in the Senate for thirty years, and has been a leader of the Republican party in that body for a long time. He is a man of great ability, and has rendered valuable service to the country. He has been a conservative leader, and has opposed many of the radical measures which have been proposed in the Senate. He has been a strong supporter of the protective tariff system, and has been one of the most influential men in the Senate. His retirement will be a loss to the Senate, and to the country.

The Democratic leaders in the House of Representatives have decided to postpone the consideration of the tariff bill until next December. They have come to the conclusion that it would be impossible to get a bill through the House before the holidays, and that it would be better to wait until after the holidays, when the members will have had time to consider the bill and to prepare their speeches. This is a wise decision, and will probably result in the passage of a better bill than could be passed if the bill were pushed through the House before the holidays

MAYOR CREGIER CRITICISES THE DRAINAGE DISTRICT PLANS.

Special Dispatch to The Tribune.

Mayor Cregier is not quite satisfied with the Chicago scheme and the drainage district, as planned and as engineered by Engineer Foster and the Sanitary Commission of the Drainage Committee. Speaking on the subject to-day, Mayor Cregier said: "I am not sure the necessity of channeling through Wisconsin, New York, Illinois, and other northern states would absorb but a few thousand cubic feet per second, although the engineers say that they would. I do not think that the engineers of Eighty-seventh street and the Calumet River have, which is now within the limits of the city, should be left out. The Mayor thinks that before the scheme is completed this engineer, whose general ability will be conceded if the district is extended, the suggestion has been made that the district can be enlarged to afterwards under one of the clauses of the act, but thinks that it would be well to consider it at the beginning.

All these agents with the Mayor and many more, as Chicago is to begin the system of the engineer, and particularly as it would be the first work of importance, and the first work of importance, and the first work of importance, and

New York exchange for sale at par. Chicago 50c premium. St. Louis 25c premium.

The local money market has been active and steady generally. There was no disturbance in sight through the engagement period that the market was steadily advancing. Most of the banks reported their rates a satisfactory basis and a large part reported that part of their loans had been renewed. The call for loans was light, however, and a large part of the loans made were on time. This is a favorable feature, as it indicates that the banks have not been compelled to call in loans to meet the demands of their depositors.
